Subject Index

Acetylcholine, 41
Acid-base interactions amd exocrine pancreatic secretion, 199–205
Agonists
  CCK-8s and pentagastrin as, pharmacology of, 129–130
  selective CCK receptor, 93–99, 101
Agoraphobia, 273
Amino acid analysis, 16–17
Amino acids and nonpeptide antagonist affinity, 67–78
Amylase release from pancreatic acini, CCK-58 and CCK-8 in, 15–16
Analogs
  of JMV180, biological evaluation of, 79–86
  synthetic, of CCK-7 and CCK-8, 107–116
Anorexia, CCK-induced, 232–233
Antagonist affinity, nonpeptide, 67–78
Antagonist pharmacology, 130–133
Antagonists
  gastrin and CCK-B, 118–119
  selective CCK receptor, 93–99, 101
  SR 27897 as, 364–367
  virginiamycin as, 353–354
Antroduodenal motility and CCK-A blockade, 222
Anxiety
  CCK in, 273–280
    and schizophrenia, 300–309
Apomorphine-induced inhibition of dopamine neuron firing, 364–367
Askin tumor, processing of proCCK in, 319–320
Asp-Phe amides, 39–40
Auditory startle reflex and LY288513, 374–376
Autoradiography of CCK-B receptors in brain, 380–383
Azaserine-induced pancreatic carcinogenesis, 439–441

Benzodiazepines, 312–318
  and CCK interactions, 132–133
  in panic disorder, 274
  withdrawal of, 374–376
Bicarbonate, ductal, and acinar lumen function, 199–205
Bile acids and pancreatic proteases inhibit CCK release, 174–177
Bile and bile acids, inhibition of CCK release by, 167–174
Bombesin, 41
Brain
  CCK action in, ionic mechanisms in, 129–135
  CCK_B receptors
    autoradiography of, 380–383
    gastrin 13, and G protein binding, 346–348
  dopamine system of, and CCK-B antagonists, 306–399
  penetration of, and CCK-B antagonists, 360–363, 377–379
Brain-gut axis, 358–359
Brain regions, CCK, and satiety, 242–251
Brain stem, distention-induced c-fos immunoreactivity in, 164–166

C-fos in rat brain stem, gastric distention and, 164–166
Ca^{2+} mobilization, CCK8-evoked, in pancreas, 335–336, 343–345
Caerulein and cholecystokinin-pancreozymin, 4
Calcium influx in pancreatic acinar cell, 41–45
cAMP second messenger pathway and CCK mRNA, 446–448
Cancer, small cell lung, CCK in, 283–294
Capsaicin, 262–264
  and gastric motility and emptying, 143, 152
Carboxyl-terminal alpha amide structure, 4
Carcinogenesis, pancreatic, and CCK, 180–194, 439–441
Carcinoids, gastric, and CCK receptors, 435–438
CCK. *See also* Cholecystokinin
CCK "A" receptors, 15, 19
CCK "B" receptors, 19
CCK analogs, 457–458
CCK antagonists, 457–458
  and food intake, 431–434
  and meal size, 237
CCK/gastrin receptor antagonists CR 2345 and CR 2194, 395–397
CCK receptor affinity and nucleoside diphosphate kinase, 350–352
CCK receptor agonists and pancreatic growth, 422–423
CCK receptor antagonists
  and exocrine pancreas, 368–370
  and gut myoelectrical activity, 358–359
CCK receptor blockade
  and pancreatic enzyme secretion, 424–426
  in GRP-mediated pancreatic secretion, 427
CCK-4 as panicogenic agent, 275–280
CCK-7, synthetic analogs of, 111–112
CCK-8
  and dopamine D2 receptors, 386–387

and feeding after microinjection into brain, 249–251
and gastrin, 118–119
-evoked Ca^{2+} mobilization in pancreatic acini, 343–345
in gallbladder and colon in ferret, 401–403
in nonulcer dyspepsia, 298–299
inhibitory action of, on rat colon, 407–408
receptor binding of, 14–15
synthetic analogs of, 111–112
CCK-58, 457–458
and physiology of cholecystokinin, 18–19
as released form of cholecystokinin, 13
as stored form of cholecystokinin, 11–13
helix-turn-helix in NH_2 terminus of, 328–330
in several species, 14
natural and synthetic, 11–20
receptor binding of, 14–15
synthesis of, 17–18
bioactivity of, 18
CCK_A and CCK_B/gastrin receptors in gastric carcinoids, 435–438
CCK_A antagonist
and gastric response to fat, 393–394
devazepide and satiety, 372–373
in irritable bowel syndrome, 449–450
in nonulcer dyspepsia, 451–453
CCK_A receptor antagonists, 261, 407–408
and gastric secretion, 442–444
and gastrointestinal motility, 226–227
and pancreatic enzyme secretion, 454–456
and satiety, 429–430
SR 27897, 364–367
CCK_A receptors, 88–103
and pancreatic carcinogenesis, 439–441
and substance P, 420–421
expression of, 53
identical, in gallbladder and pancreas, 50–53
in gallbladder, effect of CCK-8 on, 401–403
in gastrointestinal system and brain, 338–341
in pancreatic acinar cells, 81–82
in rat pancreas, 331–333
in small cell lung cancer, 290–294
molecular cloning of, 338–341
selective antagonist for, 133–135
site of, 237–238
CCK_B antagonist LY288513 and auditory startle response, 374–376
CCK_B antagonists
and anxiety, 305–306
and enkephalin analgesia, 355–357
and schizophrenia, 301–305
brain penetration of, 360–363, 377–379
inhibit brain dopamine neurons, 300–309
new, 395–397
nonpeptide
first generation, 312–313
second generation, 313
CCK_B/gastrin antagonists, nonpeptide, 118–119
CCK_B/gastrin receptor, 67–78
in small cell lung cancer, 284–294
CCK_B receptors, 88–103
and gastrin 13 binding, in brain, 346–348
and substance P, 420–421
and virginiamycin, 353–354
antagonists in panic disorder, 276
autoradiography of, 380–383
expression of, 58
by gallbladder, 56
in brain membrane, 81–83
in Jurkat T cells, 81–83, 84, 86
selective antagonist for, 133–135
cDNA deduced procionin, 324–327
cDNAs encoding precursors of gastrin, CCK, and caerulein, 36–37
Cells of immune system, CCK receptors in, 334–336
Cellular growth factors, neuropeptides as, 292–293
Cerebral cortex, CCK in, 158
Cholecystokinin, 358–359, 360–363
analogs, biological evaluation of, 79–86
for studying CCK_B receptor, 107–116
and dopamine-mediated behaviors, 138–141
and enkephalin, antagonism between, 355–357
and exocytosis in pancreatic acini, 203–204
and gallbladder function, 207–213
and gastric motility, 219–223
and gastrointestinal function, 143–155
and gastrointestinal smooth muscle, 398–400
and nonulcer dyspepsia, 298–299
and pancreatic carcinogenesis, 439–441
and pancreatic function and morphology, 180–194
and satiety, 232–234, 236–240, 242–251
and vagal afferent activity, 121–127
bioactivity of, 14
biosynthesis of, 457–458
discovery of, 2
endogenous, and food intake, 255–264
and gastric secretion after food, 442
family of peptides and receptors, 207–213
gastric fundus, and lipids, 393–394
gastrin-releasing peptide, and proteases, 410–412
gene expression, 457–458

in rat intestine, 22–29
gene, regulation of, 321–323
historical perspectives on, 1–7
in anxiety and panic disorder, 273–280
in cerebral cortex and at spinal level, 157
in gastroduodenal and intestinal motility, 413–416
in human stomach, 417–418
in nonmammalian vertebrates, 32–37
in pancreatic enzyme synthesis and secretion, 454
in rat brain, 129–135
in satiation and satiety, 268–270
in small cell lung cancer, 283–294
mode of action of, 133–135
mRNA in neuroepithelioma cell line SK-N-MCIXC,446
octapeptide and potassium currents, 384–385
pancreatic growth induced by, 422–423
peripheral, and food intake, 431–434
physiology of, 11–20
processing-independent analysis for, 319
receptor antagonists, nonpeptide, 312–317
receptor family, 49–64
receptor subtypes
and dopamine, 386–387
multiple, 88–103
receptors
high- *vs* low-affinity, 343–345
in cells of immune system, 334–336
in rat pancreas, 331–333
release, acid-induced, 388–389, 391–392
research on, 1–7
schizophrenia, and anxiety, 300–309
secretion
and bile and bile acids, 167–170
intraluminal nutrients in, 424–426
type A receptors, molecular cloning of, 338–341
Cholinergic system and CCK, interaction between, 183
Chou-Fasman analysis of CCK-58, 328
CI988, brain penetration of, 360–363
Cionin, 33–36, 207
stimulation of trout gallbladder muscle by, 404–405
Cloning, molecular, 457–458
of CCK_A receptors, 338–341
of nucleoside diphosphate kinase, 350–352
of rat CCK-B receptor, 380–383
Colon
effect of CCK-8 on, in ferret, 401–403
proximal, inhibitory action of CCK-8 on, 407–408
Cortex, cerebral, CCK in, 158
Corticostriatal pathway, CCK in, 158–159
Cyclic AMP, 41
Cyclic GMP mediating calcium entry, 43–44

D-amino acids, 7
D-tryptophan in CCK analogs in rat pancreatic acini, 83
Depression and CCK-B antagonists, 355–357
Dermorphin, 7
Devazepide, 237
and dopaminergic neurons, 364–367
and satiety, 372–373, 429–430
as CCK_A receptor antagonist, 124–125
Diazepam and auditory startle response, 374–376
Diet and CCK gene expression, 22–25
Dietary fat and gastrointestinal motility, 226–230
Diphenylpyrazolidinone, 301
Dopamine, behavior mediated by, CCK modulation of, 138–141
Dopamine D2 receptors and CCK-8, 386–387
Dopamine neurons of brain, CCK-B antagonists inhibit, 300–309
Dopaminergic neurons and SR 27897, 364–367
Duodenal ulcer, CCK, and gastric secretion, 442–444
Duodenal vagal afferent responses to CCK, 125–127
Dyspepsia
nonulcer, CCK-8 in, 298–299
loxiglumide in, 451–453

Electrophysiology of CCK responses in rat brain, 131
Enkephalin analgesia and CCK-B antagonists, 355–357
Enterokinase and cholecystokinin, 5
Estrogen and CCK, 239
Exocrine pancreas
secretion of, 203–204
and CCK, 454–456

Fat, dietary, and gastrointestinal motility, 226–230
Feedback inhibition of CCK by pancreatic proteases, 167–177
Feedback regulation, CCK and neural pathways in, 153–155
Food intake
and CCK, 255–264
and peripheral cholecystokinin, 431–434
release of hypothalamic CCK during, 244–251
suppression of, by CCK, 121–127, 243–244

Fundus, gastric, response of, to fat and CCK, 393–394

G protein in gastrin 13 and CCK_B receptor binding, 346–349
Gallbladder
  and CCK-8 in ferret, 404–403
  and loxiglumide, 183–184, 185
  and secretin, 2
  of trout, cionin stimulation of, 404–405
Gallbladder CCK_A receptor
  expression of, 50–53
  in vitro studies of, 209–213
  in vivo studies of, 208–209
Gastrectomy, CCK, and food intake, 431–434
Gastric chief cells, 93
Gastric distention and c-fos in rat brain stem, 164–166
Gastric emptying and CCK receptor antagonists, 220–221
Gastric function, postprandial, CCK and, 143–145, 146
Gastric motility
  and CCK, 143, 417–418
  and CCK-8 analogs, 112–113
Gastric secretion, endogenous CCK, and food intake, 442–444
Gastric vagal afferent responses to CCK, 125–127
Gastrin, 207–208
  isolation of, 3
Gastrin 13, binding of, to CCK_B brain membrane receptors, 346–348
Gastrin $[Ca^{2+}]$ mobilization in small cell lung cancer, 290–291
Gastrin receptors
  and CCK-B, 67–78
  and parietal cells, 63
Gastrin-like peptides from different species, 32
Gastrin-releasing peptide
  and CCK, 410–412
  in exocrine pancreatic secretion, 427
Gastrocolonic reflex and CCK, 222
Gastroduodenal motility
  and CCK-8 analogs, 112–113
  cholecystokinin in, 413–416
Gastrointestinal motility and CCK-A receptor antagonist, 226–230
Gastrointestinal tract, CCK in regulating function in, 143–155
Gene expression, CCK, 27
Genome project, 6
Glucagon and CCK, 239
GP2/PG matrix in zymogen granule membranes, 201–202
GP2/THP family of GPI-anchored proteins, 201–202
Growth factors, CCK and gastrin as, 292–293

H elix-turn-helix in NH_2-terminus of CCK-58, 328–330
Hormones, intestinal, and CCK gene expression, 25–26
Hybridization in identifying CCK receptor family members, 58–63
Hydrophobic moment analysis of CCK-58, 328
Hypothalamus
  microinjection of, with CCK, 358–359
  release of CCK from, and satiety, 249–251

I leum
  contraction and CCK-8 analogs, 113–115
  smooth muscle in, and CCK, 398–400
  substance P and CCK in, 420–421
  virginiamycin and CCK-B receptor binding in, 353–354
Imipramine and panic disorder, 276
Immune system, CCK receptors in cells of, 334–336
Immunoreactivity, invertebrate CCK-like, 39–40
Intestinal extracts, satiating effect of, 236–240
Intestinal motility, cholecystokinin in, 413–416
Intestinal satiety and endogenous CCK, 255–264
Intestine, rat, cholecystokinin gene expression in, 22–29
Intraluminal nutrients in pancreatic enzyme secretion, 424–426
Invertebrate CCK-like immunoreactivity, 39–40
Irritable bowel syndrome, loxiglumide in, 449–450

J MV180, 335–336, 344–345
  and pancreatic growth, 422–423
JMV180 cholecystokinin analogs, biological evaluation of, 79–86
JMV320, 334
Jurkat T-cells, CCK receptors in, 334–336

L -364,718 and CCK_A receptors, 93–99
L-365,260, 313–318, 334–336
  as CCK_B antagonist, 124–125
  brain penetration of, 360–363
  in CCK-B receptor binding, 353–354
L-368,935, 313–318

L-tryptophan in CCK analogs in rat pancreatic acini, 83
Loxiglumide, 222, 226–230, 237, 407–408
  and exocrine pancreatic secretion, 368–370
  and gastric secretion after food intake, 442–444
  and satiety, 268
  in gallbladder and pancreas, and CCK, 183–184
  in irritable bowel syndrome, 449–450
  in nonulcer dyspepsia, 298–299, 451–453
Loxtidine and gastric carcinoids, 435–438
LymnaDFamides, molluscs, 39
Lymphocytes, CCK in, 334–336

Methionine oxidation, 3
Migrating myoelectric complexes, 4
MK329, 221, 261, 263, 334–336
mRNA and diet, 22–29
Muscle, gastrointestinal, and cholecystokinin, 398–400
Myoelectrical activity of stomach, fasting, 358–359

Neural elements, extrapancreatic, and CCK release, 388–389
Neurobiology of panic disorder, 273
Neuroepithelioma cell line SK-N-MCIXC and CCK mRNA, 446–448
Neuronal cholecystokinin, 5
Neurons
  chemoreceptive, and CCK, 255
  gastric mechanoreceptive, and CCK, 147
  sympathetic, and CCK8, 384–385
Neuropeptides
  as cellular growth factors, 292–293
  molluscan, a new family of, 39–40
Nonpeptidal receptor agonists and antagonists, 6
Nonpeptide antagonist affinity, 67–78
Nonulcer dyspepsia
  dysmotility-type, and CCK, 298–299
  loxiglumide in, 451–453
Nucleoside diphosphate kinase and CCK receptor affinity, 350–352
Nucleus accumbens, medial posterior *versus* anterior, 138–141
Nutrients, intraluminal, in pancreatic enzyme secretion, 424–426

Oleate and cholecystokinin release, 388–389

Pancreas
  acinar cells of, Ca^{2+} mobilization in, 343–345
  and CCK_A receptor expression, 50
  and nucleoside diphosphate kinase, 350–352
  carcinogenesis of, azaserine-induced, and CCK, 439–441
  CCK release in, induced by acid, 388–389
  endocrine, and cholecystokinin, 184–187
  exocrine, and cholecystokinin, 181–184
  rat, cholecystokinin receptors in, 331–333
  secretion of, and loxiglumide, 368–370
Pancreatic acinar and duct cell secretion, coordinated, 203–205
Pancreatic acinar cells
  and CCK, 187
  calcium influx in, 41–45
  CCK-8 related analogs in, and binding, 108–111
  express CCK_A receptors, 50
  JMV180 and JMV179 analogs in, 79–86
Pancreatic enzymes
  secretion of, and cholecystokinin, 454–456
    intraluminal nutrients in, 424–426
Pancreatic proteases, inhibition of CCK release by, 174–177
Pancreatic secretion, 424–426, 454–456
  exocrine, and acid-base interaction, 199–205
  GRP-mediated, CCK receptor blockade in, 427
  induced, 410–412
Pancreozymin, discovery of, 2
Panic disorder, CCK in, 273–280
Pepsinogen release, 90–91, 94
Peptide analogs in differentiating receptor subtypes, 112–115
Peptides
  and cholecystokinin in nonmammalian vertebrates, 32–37
  cholecystokinin family of, 207–208
Peptone and CCK secretion, 424–426
Pharmacology of CCK responses in rat brain, 131
Phorbol ester (TPA) in treatment of pancreatic acini, 343–345
Phospholipase D in CCK-induced pancreatic growth, 422–423
Phospholipid effect, 6
Physiology of cholecystokinin, 11–20
PIA. *See* Processing-independent analysis
Potassium currents, CCK8, and sympathetic neurons, 384–385
Processing-independent analysis (PIA) for procholecystokinin, 319
Procholecystokinin
  mammalian, and cDNA deduced procionin, 324–327
  processing-independent analysis for, 319

Procionin, cDNA deduced, and mammalian CCK system, 324–327
Protein kinase C
and CCK mRNA, 446–448
in CCK8-evoked Ca^{2+} mobilization, 343–345
Pylorus, CCK receptors in, 238

Radioligand binding of CCK in gallbladder, 210–213
Reagents for studying cholecystokinin physiology, 11–20
Receptor binding of CCK-8 and CCK-58, 15
Receptor, gastrin, and CCK-B, 67–78
Receptor subtypes for cholecystokinin, 88–103
Receptors
CCK, in cells of immune system, 334–336
CCK_A and CCK_B (gastrin), in rat pancreas, 331–333
structure of, 50
selective antagonists for, 133–135
cholecystokinin family of, 207–208
for CCK on vagal and spinal afferents, 152–153
pancreatic, and CCK-8 related peptides, 108–111

Satiation and satiety, regulation of, by CCK, 268–270
Satiety
and cholecystokinin, 232–234, 236–240, 268–270
and devazepide, 372–373
and effect of CCK on brain regions, 242–251
intestinal, and endogenous CCK, 255–264
Schizophrenia, cholecystokinin, and anxiety, 300–309
Scintigraphy, 221
Secretin, discovery of, 1
Sensory neurons, CCK in, 159–160
SK-N-MCIXC and cholecystokinin mRNA, 446–448
Small cell lung cancer and CCK, 283–294
[^{3}H]SNF 8702 autoradiography of CCK-B receptors in brain, 380
Somatostatin and CCK gene expression, 25, 27, 29
SP-1 protein binding, 321–322
Spinal cord, CCK in, 159–160
SR 27897 and dopaminergic neurons in rat, 364–367
Stomach and cholecystokinin, 417–418
Substance P and CCK in mouse ileum, 420–421
Sympathetic neurons, potassium currents, and CCK8, 384–385
Synaptosomal endoproteases, 5

Taste aversion conditioning, 232–234
Telenzepine and exocrine pancreatic secretion, 368–370
Trypsin inhibitor and plasma CCK levels, 22–25
Tyrosine kinase in CCK-induced pancreatic growth, 422–423

Ulcer, duodenal, CCK, and gastric secretion, 442–444
Ureidoacetamides
and CCK response, 377–379
antagonist activity of, 118–119
USF protein binding, 321–323

Vagal afferent fibers and CCK receptors, 238
Vagal sensory neurons and CCK in food intake, 255–264
Vagus nerve
and CCK-induced suppression of food intake, 121–127
and gastric emptying, effect of capsaicin on, 152–153
Vasoactive intestinal peptide (VIP), 3
Ventromedial hypothalamic slice, 315
Vertebrates, nonmammalian, cholecystokinin in, 32–37
Virginiamycin and CCK-B receptor binding in ileum, 353–354

Zymogen granule membranes and acid-base interactions, 201
